- Cloud Computing

PROFESSIONAL EXPERIENCE

Technical Lead - Web Developer
Growth Securities | 2022 - Present
- Website Development: Led growthsec.com design and development using HTML, CSS, React.js, Next.js, for frontend and Node.js, Python3, and other backend technologies.
- Tool Innovation: Created engaging tools (summary pages, quizzes, calculators) to enhance user experience on the website.
- Cross-functional Collaboration: Actively collaborated with teams, ensuring seamless integration of frontend and backend elements.

Sr. Web Developer
Algoquant Fintech Limited | 2022 - Present
- Role: Integral part of Algoquant, contributing as a full-stack developer and UI designer in the dynamic fintech sector.
- Responsibilities: Leading end-to-end development, from frontend design to backend implementation, for an innovative algorithmic trading platform.
- Expertise: Leveraging skills in React.js, Next.js, Python3 and other backend technologies to create a seamless and visually appealing user interface.

Full Stack Developer
Lacspace | 2023 - Present
- Comprehensive Development: Playing a pivotal role as a full-stack engineer, engaged in both frontend and backend development using cutting-edge technologies.
- User-Centric Design: Specializing in UI/UX design, ensuring a visually appealing and user-friendly experience.
- Collaborative Integration: Actively collaborating with cross-functional teams to seamlessly integrate frontend and backend components, optimizing overall system performance.
- Innovative Solutions: Bringing creativity to the forefront, contributing to the creation of innovative solutions.
